Intl' Workshop on Global Fits to Neutrino Scattering Data and Generator Tuning (NuTune2016)

Monday, 11 July 2016 - Friday, 15 July 2016

University of Liverpool

Book of Abstracts

Contents

NEUT 1

GENIE 1

NuWro 1

Combining multiple and diverse datasets in global fits of parton distributions for LHC applications 1

Tuning experiences from collider MC 1

T2K 1

NOvA 1

SBN/MicroBooNE 1

PDFs and neutrino DIS 2

Review of theoretical developments in neutrino interaction modelling in the resonance and transition region 2

Review of theoretical developments in neutrino interaction modelling at the quasi-elastic peak 2

CCQE/2p2h and resonance tuning in NOvA 2

CC1pi tuning in T2K 2

CC0pi tuning in T2K 2

Running axial mass for quasi-elastic neutrino cross-sections 2

Comprehensive modelling and tuning of Monte Carlo generators / 0

NEUT

Corresponding Author: callum.wilkinson@lhep.unibe.ch

Comprehensive modelling and tuning of Monte Carlo generators / 1

GENIE

Corresponding Author: hugh.gallagher@tufts.edu

Comprehensive modelling and tuning of Monte Carlo generators / 2

NuWro

Global fits and MC tuning: Statistical issues and LHC experience / 3

Combining multiple and diverse datasets in global fits of parton distributions for LHC applications

Global fits and MC tuning: Statistical issues and LHC experience / 4

Tuning experiences from collider MC

The experimental perspective and needs / 5

T2K

Corresponding Author: sara.bolognesi@cern.ch

The experimental perspective and needs / 6

NOvA

Corresponding Author: b.zamorano@sussex.ac.uk

The experimental perspective and needs / 7

SBN/MicroBooNE

Corresponding Author: aschu@fnal.gov

Construction of improved theory motivated comprehensive models / 8

PDFs and neutrino DIS

Construction of improved theory motivated comprehensive models / 9

Review of theoretical developments in neutrino interaction modelling in the resonance and transition region

Construction of improved theory motivated comprehensive models / 10

Review of theoretical developments in neutrino interaction modelling at the quasi-elastic peak

Corresponding Author: vishvas.pandey@ugent.be

Model tuning results / 11

CCQE/2p2h and resonance tuning in NOvA

Corresponding Author: jeremy.wolcott@tufts.edu

Model tuning results / 12

CC1pi tuning in T2K

Model tuning results / 13

CC0pi tuning in T2K

Model tuning results / 14

Running axial mass for quasi-elastic neutrino cross-sections
